

GRANADA

This asymmetrically designed matt white freestanding solid surface bathtub comes in two sizes, the smaller version being available in both a left and a right version. The design is aimed at combining a perfect reclining shape with beautiful lines that give the bathtub a rich look. In the bottom is a pop-up in the same color as the bath itself. The outside of the bath can be sprayed in a Sikkens or standard RAL color. A special, flexible headrest has been designed for this bathtub, which provides pleasant support when lying in it.
